

Additional Notes

Hello There!

Just a couple of notes.

1. Furniture Concentrate: Take a 24 ounce spray bottle and fill it with 20 oz. of warm water. Add 1 bottle of Furniture Concentrate. Spray on furniture, mattresses, in cars, on car seats etc. Repeat spraying furniture daily for 1 week. I carry this with me in a 2 oz. spray bottle and use it in movie theaters and when I travel. Helps with the bed bug problem as well.
2. Bug Killer Laundry additive: I use this in any load of laundry that you can't wash in hot water or hot water and bleach. Use it for the next 24 hours.
3. Lice Killer a shelf life of many years if stored in a cool dark place. Feel free to use it and then put away until the next time (hopefully not) you are exposed or have contracted lice.

Please call me if you have any questions.
